Recruiting
Let us find your STARS

WestStar Group Recruiting is currently searching for a qualified General Manager.

In this role you will oversee a facility, employees, materials and equipment to ensure efficiency is maintained and projects remain on schedule for development and manufacturing projects. The General Manager is responsible for all facility operations performed at the facility. This role is responsible for ensuring successful and timely development and implementation of efficient processes to support the continued growth and expansion.

Essential Duties and Responsibilities:

- Manages and supports all employees including daily performance, disciplinary actions and ensuring employee welfare.
- Leads all aspects of development, manufacturing and site operations to ensure business growth and continuity.
- Manages the portfolio of projects for all products in the pipeline.
- Will conduct meetings with personnel to ensure work is properly delegated and deadlines are met.
- Will prioritize projects and ensure they remain on schedule.
- Will maintain safety at the facility.
- Manages the selection of equipment and final decision on process workflow to ensure controlled manufacturing of products meeting established and approved specifications.
- Directs manufacturing personnel to ensure successful manufacturing of all products supplied.
- Directs and leads the facility operations to ensure the accurate and timely completion of activities in Development, Manufacturing, and Operations.
- Ensures that commercial supply of finished material is planned and managed to prevent shipment delays.
- Participates in management meetings with other members of the senior management team to establish, delineate, and review organizational policies, to coordinate functions and operations between departments and company locations, and to establish responsibilities and procedures for attaining objectives.

Qualifications:

- Industrial manufacturing management experience is a plus.
- Preferably Bachelor's degree.
- Understanding of process development
- Knowledge of the requirements of applicable regulatory and industry standards.
- Ability to effectively present information to Senior management and other groups.
- Strong verbal and written communication skills.
- Strong interpersonal skills with the ability to build and maintain strong working relationships.
- Strong leadership and supervisory skills.
- Strong analytical and problem-solving skills.
- Ability to respond to security incidents at any time.
